About me

Senior Software Engineer and AI Engineer with 20+ years of experience developing scalable applications using React, JavaScript, TypeScript, NextJS, and Python. Specialized in voice synthesis and AI model development with expertise in deep learning techniques. Proven track record of leading engineering teams, architecting complex systems, and delivering high-quality solutions across industries. Strong background in mentorship with over 500 five-star reviews from clients worldwide. Skilled in both frontend and backend development with experience in MongoDB, PostgreSQL, and AWS services.

AI Programming Champion - CodinGame Fantastic Bits

Ranked #8 out of 5,000 participants worldwide

Developed an advanced AI agent using reinforcement learning techniques

Leaderboard: <https://www.codingame.com/multiplayer/bot-programming/fantastic-bits/leaderboard>

Skills

Programming Languages

JavaScript, Python, Ruby, TypeScript, C#, GraphQL

Web Development

Microservices, ASP.NET, CSS, Django, NextJS, ReactJS, NodeJS, TailwindCSS, Ruby on Rails, SEO, Jest
Frontend, Backend, Fullstack, Web Design

Databases

MongoDB, NoSQL, MySQL, PostgreSQL, Vector Databases

Machine Learning & AI

CNNs, GANs, Machine Learning, Supervised Learning, RAG, Transformers, Pytorch, Scikit-learn
Reinforcement Learning, Large Language Models, Model Distillation, Transfer Learning, Agentic Systems
Genetic Algorithms

Cloud & DevOps

Apache, NGINX, AWS Cloud Services, AWS Lambda, AWS S3, Docker, Linux, Serverless Development
Systems Scaling, Bash Scripting, Terraform, Kubernetes

Audio/Speech Technologies

ElevenLabs, Voice Synthesis, Automatic Speech Recognition, Sound Synthesis, Audio Mixing

Education

Cal State San Marcos (2003 - 2007)

BS in Computer Science, Minor in Graphic Design

GPA: 3.71

Coursework & Focus Areas:

- Data Structures and Computing Architecture in C
- Application programming and interface design in Java
- Web Development using JavaScript and HTML
- Database Management and Management Systems in SQL

Work Experience

VoxBirdAI (2023 - current)

Sr. Software Engineer & Voice Synthesis Lead

Location: Austin, TX, USA

- Led voice synthesis team developing celebrity voice models using deep learning techniques
- Architected "AI or Not?" testing system with feedback loop using NextJS, ReactJS and PostgreSQL
- Engineered custom tuning system for ElevenLabs integration using NextJS, ReactJS and MongoDB
- Developed our chatbot for onboarding using reinforcement learning, Python, AWS, and React, NextJS
- Implemented site redesign using React best practices (Context API, Custom Hooks) and TailwindCSS
- Built responsive frontend interfaces with ReactJS, JavaScript and modern web technologies

DevmentorLive (2019 - 2022)

Sr. Software Engineer & Founder

Location: San Diego, USA

- Engineered biogas system and solar-powered AI infrastructure with RTX 4090s
- Developed medical AI models outperforming published research benchmarks
- Architected Text-To-Speech model using GANs, Transformers architecture
- Balanced technical innovation with sustainable rural lifestyle
- Delivered solutions using ReactJS, TypeScript, NextJS, TailwindCSS, MongoDB
- Implemented reinforcement learning for game-playing AI agents
- Maintained strategic mentorship relationships from previous ventures
- Developed modern web applications using ReactJS, JavaScript, and TypeScript
- Built responsive user interfaces with ReactJS component architecture

Codementor (2016 - 2019)

Sr. Software Engineer & Mentor

Location: Los Angeles, CA

- Achieved nearly 500 five-star reviews from clients worldwide
- Mentored thousands of developers in Ruby on Rails, ReactJS, and JavaScript
- Established reputation for delivering solutions exceeding client expectations
- Gained expertise in consulting business management and client relations
- Transitioned to entrepreneurship with DevmentorLive
- Collaborated with diverse clients across industries and technical backgrounds
- Specialized in ReactJS, JavaScript, and modern frontend development
- Built and reviewed client applications using ReactJS component architecture

ReactU YouTube (2016 - 2020)

Content Creator & Educator

Location: Remote

- Built up 33,000 subscribers with \$7k monthly revenue
- Created educational content on JavaScript, ReactJS, NextJS ecosystem
- Developed effective teaching methodologies through client communication
- During this timeframe I went deep on machine learning, genetic algos, and reinforcement learning

Uber (2015 - 2016)

PostgreSQL Expert (Contract)

Location: Dallas, TX

- PostgreSQL to MongoDB, MySQL migration at scale
- Developed database transition pipelines to migrate very large datasets
- Ensured data integrity during migrations by building a logging system

Callaway Golf (2013 - 2016)

Software Engineer

Location: San Diego, USA

- Engineered MySQL database systems for the e-commerce platform
- Developed optimized stored procedures to efficiently manage large product catalog
- Implemented complex SQL queries for inventory management and order processing
- Architected ASP.NET components for the online store's shopping experience
- Integrated secure payment processing through merchant account services
- Developed scalable backend services for product catalog management
- Introduced to Ruby, LISP by Jim Weirich
- Pivoted to Ruby on Rails development
- Developed interactive frontend features using JavaScript and jQuery
- Built responsive user interfaces for e-commerce platform

GEICO (2012 - 2013)

Software Engineer (Contract)

Location: Poway, CA

- Developed SOAP interfaces for COBOL, DB2 systems
- Created Ruby automation scripts to make migration code easier
- Trained my offshore replacement during transition
- Implemented frontend interfaces using JavaScript and jQuery
- Developed client-side validation and interactive UI components

Intel (2009 - 2011)

Software Engineer

Location: Hillsboro, OR

- Pioneered sports streaming for NHL, NBA using the .Net platform
- Stayed late and worked weekends to meet deadlines and skill myself up
- Learned the importance of teamwork and communication with Stakeholders
- Developed frontend interfaces using JavaScript and jQuery
- Built interactive user experiences for sports streaming platform

UpperDeck (2007 - 2009)

Jr. Software Engineer

Location: Carlsbad, CA

- Maintained PostgreSQL systems for Marvel Vs platform
- Developed complex SQL queries, stored procedures
- Optimized database performance through indexing
- Built interactive UI with JavaScript, CSS
- Implemented drag-and-drop card management framework
- Implemented interactive UI components with JavaScript and jQuery
- Developed client-side functionality for card management system
